Who are we?

Established in 1959, Stylus Made to Order Sofas has grown to be one of Canada's largest furniture manufacturers. Stylus operates two locations in greater Vancouver in addition to showrooms located in Vancouver and Las Vegas. Stylus employs more than 180 people.

Stylus products may be purchased through better furniture stores across Canada and throughout the Western United States.

Stylus is committed to continual improvement in the environmental footprint we leave. From managing our supply chain to our manufacturing processes we are committed to environmentally sound choices. With the environment in mind we have made the following choices on all of our domestically made products:

Wood supply

- Our frames are made from wood sourced through suppliers who are certified for environmentally sound practices. These certifications include the Forest Stewardship Council CSA Sustainable Forest Management standard and ISO 14001 certified Environmental Management Systems.

Manufacturing

- Recycling programs are in place for paper, cardboard, plastic and foam waste.
- Natural light skylights reduce our energy needs for lighting.
- Selective packaging allows us to save packaging materials on shipments that have less anticipated handling.
- Efficient in-floor radiant heating is used to target areas where staff is less active, reducing the need to heat the entire production facility with gas heaters.

Foam Supply

- Our foam supply is from a zero waste supply chain. Scraps are recycled into carpet underlay.
- All of our foam supply is chlorofluorocarbon free. chlorofluorocarbons have been shown to deplete the ozone layer.
- The blowing agents used in the manufacturing of our foam are methylene chloride free.
- Our foams are free of polybrominated diphenyl, a fire retardant that is linked to cancer.
